HIGH/LOW BAY FIXTURES

The next level in fluorescent high bay for mounting over 25 feet. This fixture is available for 8 or 9 lamps in T8 or T5 configurations or a combination of the two. Three T8 lamps could be positioned in the center of the fixture for separate control by motion sensor or battery pack. Then the other six lamps could be outboard in T5 or T8. With nine lamps, three ballasts are required and ballast trays are provided. There is room for four ballast trays in case an additional one is needed for the battery pack or sensor controls. Even with nine lamps, there are NO HEAT problems as the ballasts are located in the side rails unlike typical "troffer" style high bays with the ballasts mounted over the lamps. This fixture has the **potential of having 45,000 lumen output at 25 degrees C.** The luminaire package measures 22 inches wide by 50 inches long by 2 1/2 inches high. Three enhanced aluminum reflectors are standard with this fixture. Optional wire guard is available.

This is an upscale, specifiable compact low bay that is only 7 3/4 inches wide by 2 inches high. Extremely small profile for special areas. It is available in 4 foot, 8 foot and 12 foot one piece housings that can be tandem mounted. The housing can be perforated for uplight component. The T8 version utilizes two lamps for every four feet and the T5 version can use two or three lamps for every four feet. Optional enhanced aluminum reflectors are also available for the T5 and T8 lamps. This luminaire is perfect for continuous joined runs over assembly and packaging areas in manufacturing facilities.

SERIES 820 ULTRA HIGH BAY

45,000 LUMEN OUTPUT

SERIES 830 INDUSTRIAL LOW BAY

SLIM 2" X 7 3/4" PROFILE IN 4FT, 8FT AND 12FT LENGTHS

ADAM METAL PRODUCTS

HIGH/LOW BAY FIXTURES

Standard high bay with the option of 4 or 6 lamps, T5 or T8 or a combination of the two. Sides rails are designed for ballast trays, up to four, in order to reduce heat associated with "troffer" style high bays with ballasts over the lamps. Individual 95% enhanced aluminum reflectors for maximum control and high spacing ratio. Reflectors can be 100% downlight or with slots that will allow 10% uplight. Unit can be surface mounted, suspended with stems, chains or cable. Frame size is the same as the Series 820 Ultra High Bay. Optional wire guard is available for field installation. The ideal luminaire for big box stores, sport facilities and multi-function rooms.

This fixture is the economy version of the Series 800 in that it is only 15 1/4" wide by 50" long and 2 1/2 inches deep. It uses two enhanced aluminum reflectors with 4 or 6 lamps, T5 or T8 or any combination of the two. Can accommodate four ballast trays for sensors and battery packs. Unit can also be surface mounted, suspended with stems, chains or cable. An optional wire guard is available for field installation. A great fixture for warehousing, manufacturing and other large industrial areas.

SERIES 800

HIGH / LOW BAY

T5, T8 OR A COMBINATION OF BOTH LAMPS

SERIES 810

HIGH / LOW BAY

ECONOMY VERSION
